Bottom line All things considered, MKV to AVI Video Converter comes bundled with basic features for helping you convert MKV files to AVI file format at the same time. @y0 Cannot believe how simple this program is. It doesn't even install software, it just runs a script file. This is a great step forward for portable/usb/email DVD/video conversion software. A: I know that this question is already answered, but I can tell you how to convert the MKV to AVI directly, without MKV to AVI Converter. First you need to install a codec pack, just like I did on my PC. There are many codec packs on the internet, but the most popular ones are: VideoLan CATCodec Pack Movie Video Codec Pack MediaInfo Then you can convert the MKV to AVI in a Windows terminal as follows:

I've just been introduced to this, and I don't quite understand it. The explanation I've been given is that scheduled jobs run on the client, which makes sense. However, I've also been told that the status of the job is also held on the client. What confuses me is that it seems counter-intuitive that the server wouldn't be able to see what the client is doing in a scheduled job. It also seems counter-intuitive that the status of a job is held on the client, because then the server wouldn't know what's going on with the job, if it's not running on the client. So is the client responsible for the scheduling of 77a5ca646e
